# BABURKA PHOTO CHALLENGE

## SEND US A PICTURE OF YOUR MAKEUP

We will post it in our website with your credits and every 6 months

The best will win a **€100,00** coupon to spend on our products

win  
**€100,00**  
coupon

### **BABURKA PRODUCTION**

Is an independent movie production company founded by young professionals of the industry with a common goal: to promote the idea that it's possible to reach high levels of quality simply by starting from new powerful ideas and a strong passion. Baburka's artists and technicians are able to work in every field of the Movie Industry, from the pre- to the post-production.

### **BABURKA FACTORY FX**

is Baburka Production's section which provides services of:

- **SFX:** prosthetic make up, creature design, anatomic reproduction, gore effects, puppets, animatronics
- **BODY PAINTING**
- **MAKE-UP AND HAIR STYLING**
- **COSTUME DESIGN:** costume design, cosplay, set and scenic design, with specialized technical support (from fabrication to painting), and props.

The Factory Members works in the movie industry, theater and fashion. They provide also consultation and organize didactic workshops at their studios.

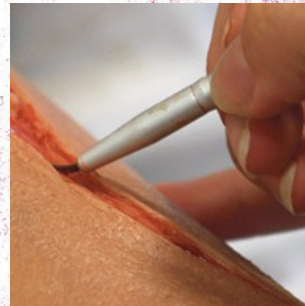

### **BABURKA CINEMA CRAFTS**

Is the new line of handmade products realized by Baburka. Standard prosthetics, standard moulds, props and much more, all designed by professionals.

G3: 07x08 cm

### G1+G2+G3. Gunshot wounds

Platinum silicone gel  
with cap plastic edges

*N.W. Wash carefully the prosthetic with dish soap and dry it before the application*

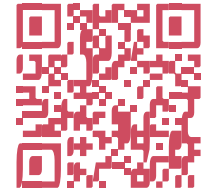

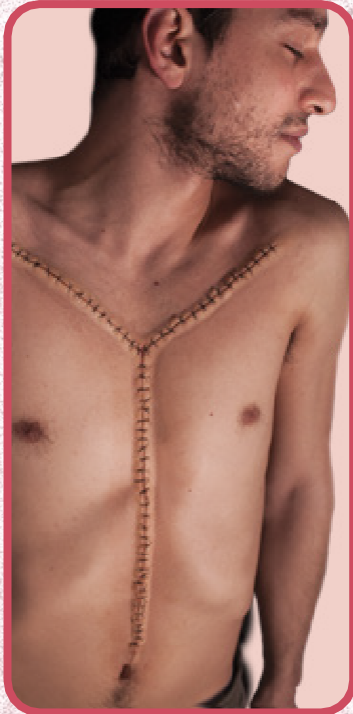

### PAINTING

Making a first light layer with red color helps to bring the prosthetic "to life", because it emulates the color of the blood under the skin.

ATTENTION: less is more don't exceed with the painting. Translucency is what makes silicone and gelatine similar to the real skin.

### SILICONE

Latex is silicone's kryptonite! Platinum silicone is easily subject to corruption. It's very important to keep clean the work place. Latex should never touch silicone before its catalysis.
